In order to improve the strength of the
structure, the tripod legs with supports at
their ends are secured with a steel chain.

The drive-on plate is made of galvanized and stainless steel and is used for installation of counterweight. Counterweight can be a set of steel plates or a vehicle weighing 3.5 t . The plate can be fixed to the ground by means of mechanical or chemical anchors.

## +

Set of steel plates can be used as counter weight if the tripod cannot be anchored by a weight if the tripod cannot be anchored by a vehicle or fixed to the ground. Comprises of 25 kg each.

| Height: | 208 cm |
| :--- | :--- |
| Extension: | 71 cm |
| Overall length: | 362 cm |
| Leg spacing: | 165 cm |
| Weight: | 65 kg |
| Lifting and lowering: | $\max 200 \mathrm{~kg}$ |

ANCHORING TO THE GROUND

Drive-on plate can be fixed to a concrete or steel surface by means of at least 2 mechanical or chemical anchors with minimum tensile strength of 12 kN .
VEHICLE AS A COUNTERWEIGHT

Drive-on plate can be loaded by placing a vehicle wheel on the axle at which the motor is installed. Minimum overall vehicle weight is 3.5 tons.

SET OF STEEL PLATES AS A COUNTERWEIGHT

Drive-on plate can be additionally loaded with special steel counterweight plates of 25 kg each.

STEEL PLATES SET ATO15-600,

- Counterweight plates -16 pcs
- Set of mounting screws - 1 pc
- Counterweight bracket rods -2 pcs
- Rods plate -1 pc

HEAD - PLAN VIEW

The head is made of powder coated aluminum and has three ball-bearing wheels for guiding the work rope on rescue or lifting devices.

Aluminium steps are mounted with cotters and provide easier access to the tripod head when extending the legs to their max imum height.

Steel feet have rubber pads for flat surfaces and spiked edges for slippery surfaces.

The tripod legs are made of strengthened aluminium profiles with 9 -step adjustment, locked with cotters. Legs are equipped with a wheels (for guiding the work rope) and anchor point (bore) for mounting winches.

 WITH BELOW DEVICES USING NEW UTB BRACKETDESCRIPTION OF DEVICE:

RUP 502-U RUP 503-U RUP 504 RUP 505-U RUP 506 CRW 300

The lightweight TM16 aluminium safety tripod is an anchor point according to EN795/B and TS164415/B and can be used as a fall protection equipment. The TM15 tripod provides protection for up 103 people at a time. The TM15 tripod consists of a powder-coated aluminium head with 3 ball-bearing polyamide ollers. The tripod is also equipped with 3 nchorage points on the side walls of the sed as an anchor point for equipment ised as an anchor point for equipment oint is designed for a maximum of one user at a time.

Head made of powder painted aluminum. It has 3 bearing rollers for guiding the working rope of rescue

The tripod legs are made of strengthened aluminium profiles with 9 -step adjustment, locked with cotters. Legs a anchor point bore) for mounting winches. anchor point (bore) for mounting winches.

New swivel foot with suction cup with a diameter of 120 mm .

New swivel foot with rubber base with a diameter of 120 mm .

UTB holder described on page 4.

The universal holder (UTB) can be attached to all tripods offered. The following winches are compatible with the UTB carrier:
RUP502/RUP 502-T RUP503/RUP503-T

DIMENSIONS

PROTEK

TM 16

When instaling the device on irregularly shaped surfaces the use of chain or tape to connect the legs may be problematic. It $s$ permissible to use bracing in the form of additional pipes with diameters from 48.3 mm to 60 mm connecting individual legs by
means of rotating SPC pipe connectors.

SPC pipe connector

## Q RUP502-U

spring-type energy absorber SDW.

MAIN FEATURES:

| Winch weight: | $13 \mathrm{~kg}, 14 \mathrm{~kg}$ | $\qquad$ |
| :---: | :---: | :---: |
| Available cable variants: | $20 \mathrm{~m}, ~ 25 \mathrm{~m}$ |  |
| Cable diameter: | $6,3 \mathrm{~mm}$ |  |
| Cable type: | $6 \times 19+$ NFC | EN 1496/B |
| Mechanism ratio: | 1:5 | $\Omega$ |
| Force applied to lift 140 kg for variant 1 : | 5,6 kG |  |
| Force applied to lift 140 kg for variant 2: | 11,6 kG |  |
| Permissible work load: | 140 kg | 8 |
| Standard: | EN 1496/B | 1 person |
| Compatible with ALL tripod types |  | at max. 140 kg |

## Q RUP503-U

RUP 503 -U is a winch equipped with clamp for mounting on tripod leg. The winch is equipped with six-strand steel cable with $\mathrm{m}, 35 \mathrm{~m}, 45 \mathrm{~m}, 50 \mathrm{~m}$ in length and 6.3 mm in diameter;

RUP 503 -U is a component of rescue equipment. Usingthe device, a casualty can be ifted from a lower level onto a higher level or vice-versa. The descent distance cannot be more than 2 m ;

With the ratio used in the mechanism it is possible to make one turn of the drum per 7.2 turns of the winch's crank;
rank arm can be disassembled for easier transport
The RUP 503 rescue device complies with EN 1496/B.

## Q RUP505-U

RUP $505-\mathrm{U}$ is a rescue lifting device equipped with clamp for mounting of th device on a tripod leg. The lifting devic length as required by the customer. Th rope should be ordered separately.

RUP 505-U is a component of rescu equipment.Using the device, a casualty can be lifted from a lower level onto a higher level or vice-versa. The descent distance cannot be more than 2 m

With the ratio used in the mechanism it is possible to make one turn of the drum per 2.13 turns of the device's crank or in the second mode, 6.2 turns;

The crank is easily dismounted to facilitate transport;
The RUP 505 rescue device complies with EN 1496/B.

## Accessories

Spring-type energy
absorber SDW

main features:

| Lifting device weight: | 8 kg | EN 1496/B |
| :---: | :---: | :---: |

| Force applied to lift 150 kg kg for variant 2: | 3,75 kG | device for up to |
| Permissible work load: | 150 kg | 150 kg |
| Compatible with tripod type: | TM9-N, TM 15 |  |
| Standard: | EN1496/B |  |

## (Q) RUP504

RUP 504 cable single-phase 230 V electric winch
230V AC 1-phase electric winch equipped with a wire rope of the diameter of 6 mm and the length of 30 m rolled on a drum. The device is used to lift goods. Admissible working load while lifting goods (WLL): 500kg. If an additional TU415 / TU416 block is used, the working load when lifting goods (WLL) can be increased to 1000 kg . The device can be used to lift and descend people and to evacuate them when an additional self-holding device of the WR / CR / CRW series is used. Admissible working load when lifting / descending people (WLL): 200kg. A 230V 1-phase alternating power supply. The kit includes a cable for connection to the mains with an EU plug.Operating speed: $7 \mathrm{~m} / \mathrm{min}$ (when using $T U 415 / \mathrm{TU} 416 \mathrm{block}-3.5 \mathrm{~m} / \mathrm{min}$ ). The device is equipped with a tie plate (RUP506-000-001) as well as with a UTB connector (ATO17-330).

RUP 506 cable battery powered winch
Electric battery winch equipped with a wire rope of 5 mm in diameter and of the lenght of 15 m , rolled on a drum. The device is used to lift goods Admissible working load while lifting goods (WLL): 140 kg . If an additional TU415/TU416 block is used, the working load when lifting goods (WLL) can be
 together with a charger. The battery life at full load equals $\sim 20 . . .25$ minutes. Operating speed: $4 \mathrm{~m} / \mathrm{min}($ when using TU415/TU416 block $-2 \mathrm{~m} / \mathrm{min}$ ). The device is equipped with a tie plate (RUP506-000-001) as well as with a UTB connector (ATO17-330)

| PARAMETERS |  |

CRW 200 is a combination of a retractable type fall arrester and a rescue lifting device. The device is equipped with a manual winch featuring lift and descent functions.In order to install on the tripod, first mount an adequate mounting clamp;

Connector has a fall indicator; the design requires no energy absorber;

Permissible work load: 140 kg ;
With the ratio used in the mechanism it is possible to make one turn of the drum per 7.4 turns of the winch's crank:

Retractable type fall arrester CRW 200 is a component of personal fall protection equipment and conforms to EN 360 and EN 1496/B.

PULLEYS PL 101, TU 415, TU 416

TU 416
Pulley TU 416 with steel hook is used for lifting and lowering loads with weight of up to 2000 kg . It can be used both with ste cables (between 6.3 and 8.0 mm in diameter) and textile ropes (of diameters between 10,5 and 14 mm ). The mechanism ratio $2:$ : allowing for lifting of as much as twice the load using a given winch. The product can be used with all winches and Protekt tri pods. When used with tripods and winches with admissible load of 1000 kg (TM 6-T, TM 12, TM 12-2, TM 15) it is possible to increase the load capacity of the whole combination up to 2000 kg .
